Wireframes - Web Index page

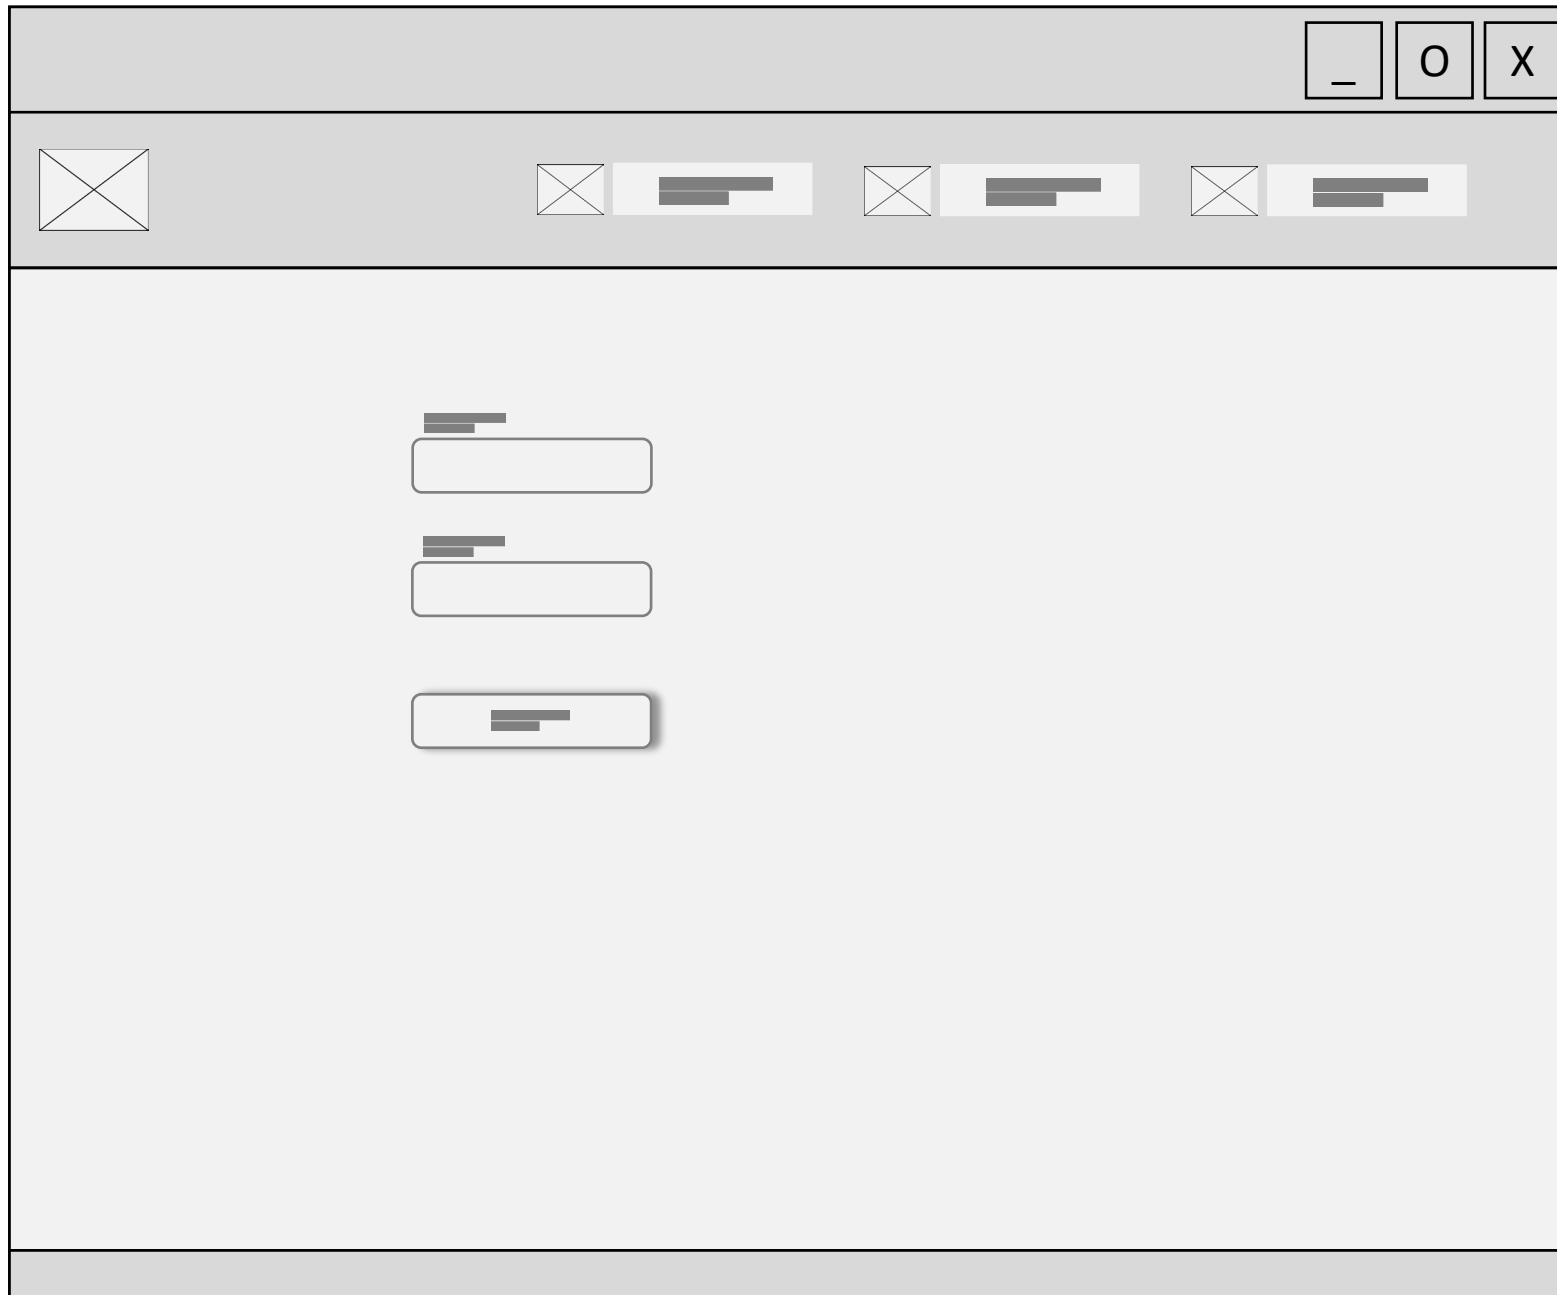

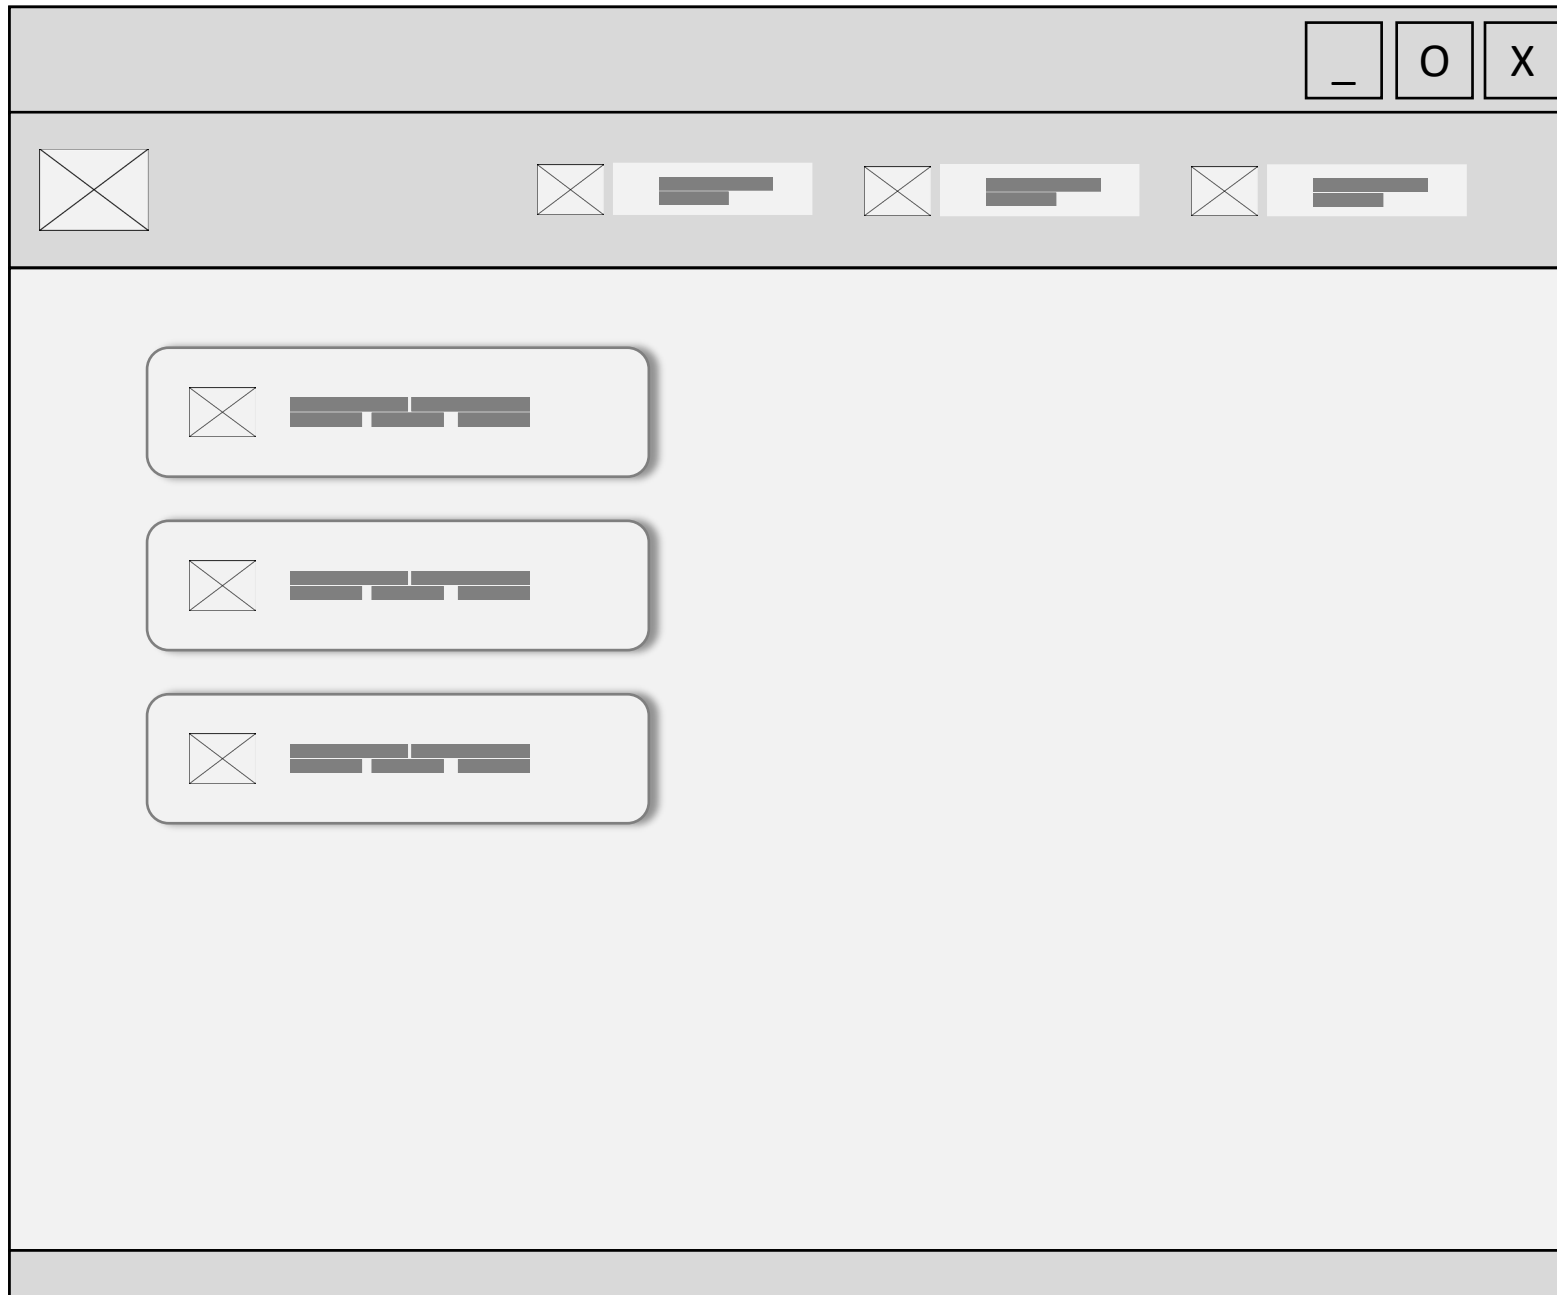

Footer

The wireframe illustrates a web contact page layout. It features a header bar with a logo placeholder and window control buttons (minimize, maximize, close). Below the header is a navigation bar containing back, forward, and search icons, a search input field, a close icon, and a list of menu items. The main content area includes a title, a row of three input fields, a long text input field, a large text area, another long text input field, and a submit button. The footer contains two columns of placeholder text and an upward arrow icon.
